

Join the Faith-Based Organization Community

The NCDIT Office of Digital Opportunity convenes a quarterly meeting of faith-based organizations, including churches, ministries, and community partners, that provide or would like to provide services and resources to close the digital divide.

Through this series of virtual meetings, attendees can learn, share best practices and collaborate on initiatives that promote digital skills, computer and device distribution, digital navigator programs and other opportunities that expand access to technology.

The community is also planning to include periodic in-person gatherings to strengthen its collaboration.
